# Fleet Management Industry Overview

**This is the first time ever such an extensive and well integrated software for Fleet and Transport Industry is made. eresource ERP for Fleet Management is the number one Fleet/Transport Management ERP that will help your business grow with guaranteed return on investment. With eresource ERP in the operational mode, you can manage your Fleet and Transport business with efficiency and it is an user-friendly ERP solution.**

## **Why eresource?**

### **Access your business Anytime, Anywhere**

Working on a Web-based ERP system like eresource will give you the freedom and flexibility to manage your enterprise from anywhere. With eresource ERP it is possible for you to work from office, home or while travelling. It enables share your business information with colleagues even without having to send files back and forth. An advantage indeed!

### **Manage your business more effectively**

Eresource ERP allows users to access modules based on the access permission granted to them. Even the contractors, customers and suppliers can access their respective information through the permitted modules. All the events clicked by any user are recorded in the activity log section, which makes sure that everyone is accountable and every transaction is traceable.

# Fleet Industry Challenges

- **Low operating margins – sharp competition**
- **Rising Fuel costs**
- **Increase in Insurance Cost**
- **New vehicle-related legislation and mounting service demands**
- **Loss of productivity and increase in Operating Cost**

# Key Benefits

## Increased customer loyalty

Resource ERP provides organizations with more flexible and extensible system that enables them to easily adapt, change and add operational functionality to the system in order to meet customer demands and easily adjust to changes in the marketplace. With Resource ERP, you can gain visibility into your customers' needs and build the right strategies to meet those needs - so you can serve a broader range of customers and meet the unique needs of each.

## Optimized Management of Vehicles

Continuous planning of transport and the logistics involved decreases wasted journeys. ie. Those made without a profitable burden. Increased visibility, through system, of available time allows more effective and efficient use of time.

## Cost Saving on Transportation

With integrated software solutions you are given more control of the execution of activities of the vehicles in your fleet, enabling you to track and trace activities in real-time, ensuring that potential problems are spotted and handled before they actually become problematic.

# Key Benefits

## **Flexible Management of Tariffs**

The software allows for an easy and flexible management of your tariffs, payable and receivable, as well as easy updates for increases such as fuel.

## **Measurement of Lifespan of Order**

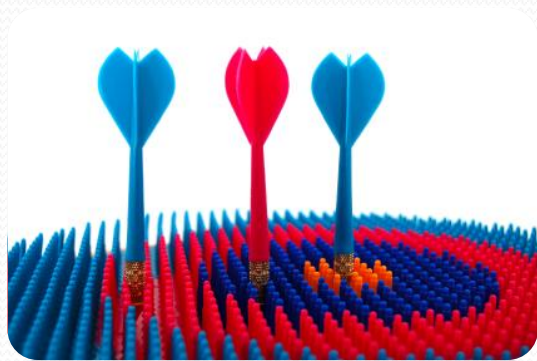

Investigation of order history can help you to improve the efficiency of your transportation as well as providing strong performance indicators to enable consistent improvement.

## **Increased efficiency**

Reduce costs through effective planning and therefore less wasted kilometers and more running time.

## **Lower technology costs**

Being a web based ERP solution, eresource lowers the total cost of IT ownership by evolving to support the latest technologies; allowing easy integration with partners, suppliers, and customers; and supporting the entire value chain.

# Key Benefits

## Faster turnaround

Resource ERP helps organizations to provide better service and be more responsive to the demands of customers and business partners through multi-dimensional tracking features and advanced order-promising capabilities. With Resource solutions, you can communicate easily with suppliers and customers - optimizing complex program management, reducing cycle times in the supply chain, and speeding reporting.

## Improved asset performance

Resource solutions enable optimal asset utilization and efficient asset maintenance by lowering repair costs, decreasing labor costs, and making planners and technicians more productive.

## Higher profits

With the use of Resource ERP software system, organizations can set budgets, review costs, track activities and resources. You can perform profitability analyses that help you focus on the most profitable value-added services, offerings, and customers.
